KAWAGUCHI KIYOSHI

(54) DISCOUNT PROCESSING SYSTEM FOR POS SYSTEM

(57)Abstract:

PURPOSE: To make it possible to discount only commodities belonging to a lower sort layer and to improve the discount processing function of a POS terminal by specifying a commodity to be discounted and its discount data by a commodity sorting code on an optional hierarchy.

CONSTITUTION: A discount file 1 formed by specifying a commodity to be discounted and its discount data by a commodity sorting code on an optional hierarchy is read out by a discount information setting part 3 and added to commodity management information stored in a commodity master 2 as discount information. Since a discount processing part 4 executes the discount processing of the commodity to which the discount information is added, the selecting width of commodities to be discounted can be expanded. Namely the discount processing part 4

reads out a commodity identification(ID) code transferred from the POS terminal 5, retrieves the file 2 by using the read code as a key, and when discount information exists, updates the selling price of the commodity to a discounted value based upon the discount information, and displays the updated value on a display part of the POS terminal.

LEGAL STATUS

[Date of request for examination] 10.02.1995

[Date of sending the examiner's decision of rejection] 18.02.1997

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
